STRUCTURAL DETAILS

FIBERGLASS PLANTERS

Tintori Castings planters are durable and beautiful. Our goal is to assure our planters will keep their shape and support the plantings over time.

Dense **Fiberglass Board** supports the perimeter of every planter. The supports are fibreglassed into place to ensure stability and durability.

This board can also be used to screw planter walls together to create a long sturdy span of planters.

Fiberglass Board covered with fiberglass supports perimeter of planter

(Inside planter view)

Drainage Holes, spaced at industry standard intervals based on square footage provide a path for irrigation. This is essential for both the planter and plantings.

The floors of our planters are designed to tilt slightly toward the drain holes.

Drainage holes can also be customized

Support Structure for Large Tree Planter

Fiberglass Board is great for extreme wall lengths, makes for structurally sound straight walls and increases R-ratings to protect plants.

Cleating is optional and adds 20% to planter cost.

Other elevation options are available as needed.

Corner Support Structure

Cleating elevates the planter bottom to ensure irrigation can flow through the drainage holes out of the planter. Cleating spans the width of the planter and also adds support for the floor.

COLOR OPTIONS

FIBERGLASS PLANTERS

The **color options** below are just some of the more popular color choices available for our fiberglass product. We can match any color available in the market, including faux granite, and copper and iron mixes in the color. We provide our Natural Lead Grey at no extra cost, but all other color choices have a percentage increase as noted below.

Our manufacturing process applies color with a **Gel-coat surface** instead of pigmented resin. Applying this separate layer of material with color keeps the color rich for a much longer period of time, provides UV protection, increases color durability and provides an even, sleek surface.

Color adds an additional 5% cost to wrap and protect planters during shipping.

NATURAL LEAD GREY: No Additional Cost

WHITE: Adds 25% to cost

BLACK: Adds 20% to Cost Matte Black or Semigloss Available

IRON: Adds 65% to Cost
Contact Us For This Color's Special Features

CHOCOLATE BROWN
Custom Color
Adds 20% to Cost

TERRA COTTA: Adds 20% to Planter Cost

We can match any color given a color sample or color code such as Benjamin Moore or Pantone

Most Custom Colors:
Add 20% to planter cost

All Colors:
Plus additional 5% for packaging

This wholesale price list is for 2023. However, all prices are subject to change based on our material costs and other production variables such as adding custom requests.

WOOD

CUSTOM CREATIONS

Our expert woodworkers can assemble a variety of wood designs for your project. Various wood types are available. We can also create fiberglass liners for your wooden planters, in several methods: 1) a hand laid fiberglass liner in your existing wooden planter brought to our shop 2) a freestanding fiberglass liner that drops into your wooden planter, complete with structural supports and 3) a liner that you can clad with your own wood as in the sample shown below.

TINTORI CASTINGS FIBERGLASS PLANTERS *TWENTY YEAR LIMITED WARRANTY*

Thank you for your purchase of Tintori Castings products. We stand by our products and are pleased to offer this exclusive twenty-year limited warranty on our fiberglass planters as follows: Tintori Castings will repair or replace any planter that we reasonably determine contains a defect in material or workmanship for a period of twenty (20) years from the date the planter is delivered to the client or picked up from our workshop by the client. This warranty does not cover normal wear and tear as described under "Product Expectations" below. It additionally does not cover: Damage resulting from impact, drops, or other accidental damage that occurs after a planter is in the possession of the client (More under "Shipping" below; attempting to move the planter with material inside; improper installation; improper maintenance including failure to maintain proper water irrigation flow, internal or external drainage: installing plantings whose size, root systems or other characteristics make them inappropriate for the planter, including future growth plan; or Acts of God. Any painting, staining or otherwise modifying the surface or internal support structure our fiberglass planters may damage them and will void this warranty.

Product Expectations: There are some conditions that are natural adaptations of the planter to its new environment. It is normal for there to be slight variations in the color or surface of the fiberglass planter over time as it is exposed to the elements. Because there is stone in the resin mix, it has a natural aging process like stone. Additionally, once the planter has been filled with soil, there may be some give as the weight of the planter soil helps it settle into its proper shape. Fiberglass has zero tolerance to movement, so moving the planters especially after planting may cause changes to the planter surface. There might be small cosmetic surface separation as the planter settles. Proper irrigation is essential to the health of both plants and planters, and regular maintenance is imperative to make sure the water flow is not obstructed.

Shipping: Tintori Castings makes every effort to determine the best way to protect our planters until they are in the client's possession. We will ensure the arrival of your product in excellent condition. Once the planters are approved and accepted at drop-off, both parties assume that Tintori Castings has fulfilled its responsibility for producing and delivering Quality planters as agreed. However, if the product is picked up by the client from our workshop, the client is responsible for the condition of the product from that point on. Tintori Castings is not responsible for any transport damages once the product has been picked up by the client.

Tintori Castings Service Level Agreement: This warranty is limited to repair or replacement of the defective parts of the warranted product. It expressly excludes any incidental or consequential damages, including, but not limited to damage to plant installations. Tintori Castings will not acquire any shipping or packaging fees for returns. Tintori Castings expressly disclaims any implied warranties, including but not limited to any implied warranty of merchantability or implied warranty of fitness for particular purpose, to the fullest extent allowed by applicable law.

At Tintori Castings we will do our utmost to respond to our customers' needs on a prompt and timely basis. For any inquiries, please contact us at 845-382-9773 or by email at info@tintoricastings.com.

ABOUT TINTORI CASTINGS

Tintori Castings is a family-owned and operated business located in the Lower Hudson Valley in New York State.

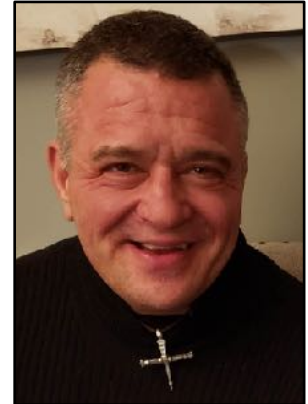

The Tintori story began in Bagni di Lucca, Tuscany, Italy, where mold-making and casting is a way of life. Since the original founder, **Donato Tintori** arrived in the U.S. in 1963, this heritage continued throughout various locations, until he eventually settled in Accord, NY. From plaster casting for florists and furniture stores, to concrete statues and garden novelties, to finally fiberglass planters, the company has evolved and grown its business. We now serve architectural and landscape designers' needs in the New York Metro and surrounding areas. Our fiberglass planters are made with expertise that has been fine-tuned over the years to emerge as the beautiful product it is today.

Marco Tintori inherited the business from his father and now, with his wife **Lisa**, they operate the business together. The local artisans that work in our shop are trained in all aspects of creation of the planters - from mold making to fiberglass pouring and finishing, and all points in between. We have crafted custom planters for a wide array of projects and take pride in the custom work we create by hand, piece by piece.

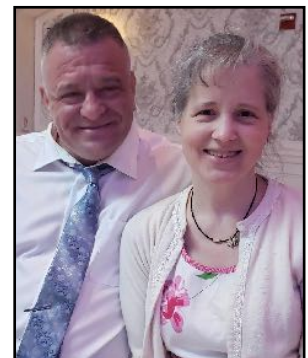

Our planters are on rooftops, terraces and patios, in gardens, entryways, restaurants and hotels. Our containers are installed at the rooftop of the Armory in Central Park, along Fifth Avenue, at the French Consulate, at the US Open, at key locations along Broadway in NYC, and on many celebrity rooftops. Our projects are in residence in all five boroughs of NYC and have traveled as far as Pennsylvania, Washington D.C., and Texas.

In 2018, Tintori Castings was accredited by New York State as a Service-Disabled Veteran Owned Business (SDVOB) acknowledging Marco's time spent serving our country on two foreign soils. Tintori Castings is proud to support local Veteran opportunities.

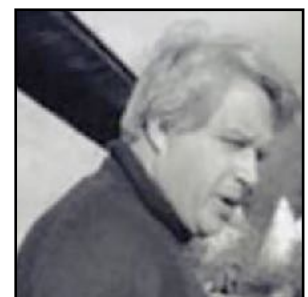

We encourage visitors at the Tintori Castings workshop. Clients are welcome to come to the shop and observe our planning and production to understand what makes Tintori Castings so unique.
